Keeping you happy

Welcome to a new world of high quality dental care.

At Glendair Dental Practice, our highly skilled team is totally dedicated to helping you enjoy the confidence of having a bright, healthy and attractive smile.

We take a relaxed approach to your dental care, and do everything we can to ensure your comfort...particularly if you might be nervous about visiting the dentist.

Keeping you comfortable

We've made a big investment in our practice.

We have the highest quality equipment, a team we're really proud of and, we believe, the very highest standards of dental care.

Glendair Dental Practice combines state-of-the-art technology with the considerable expertise of our highly skilled team. This enables us to provide you with all the treatment you could ever need under one roof. It makes your dental care more comfortable, more affordable and more successful... with no need for delays or referrals elsewhere.

Keeping you **confident**

Our Dentists, Nurses, Therapists, Hygienists,
Managers and Receptionists.

We all offer different skills and specialities to take good care of you, your teeth and your smile – from children’s dentistry, to smile makeovers, to high tech general dentistry, to facial aesthetics – we’ve got everything covered.

We do have one thing in common. For all of us here at Glendair Dental Practice, dentistry is more than a job. It is a passion. Which is why we take the time to continually update our skills to offer you every advantage from advances in dentistry.

Keeping you healthy

Now you can smile with confidence.

We provide a wide range of different treatments to create the attractive smile you want. For some people this may be with veneers, implants, tooth coloured fillings or teeth whitening. For others, it may mean complex reconstructions. Whichever is right for you, we're here to make sure you see the results you're looking for.

Similarly, when it comes to everyday, routine dental care, you can rely on the Glendair Dental Practice team for the highest standards of treatment that we always tailor to your needs.

Keeping you relaxed

We appreciate not everyone relishes visiting the dentist.

Which is why we do everything we can to make you feel relaxed.

We start by creating a calm and comfortable environment.

For some people, sedation is the answer. We can provide a painless injection which helps you feel drowsy and removes the fear of treatment.

Should you prefer, we can also offer relative analgesia, an inhalation technique similar to 'gas and air'.

Keeping you in control

Everything we do at Glendair Dental Practice is with your comfort in mind.

This even extends to paying for your treatment. For an affordable regular payment, our easy finance package – Denplan – will pay for all your preventative and routine dental treatment to our high quality private standard. Denplan provides for all your future dental needs, and offers you real peace of mind in that the cost of your treatment is always covered¹. Denplan payments can be made monthly or annually to suit you.

Keeping you informed

Isn't it best to be kept in the picture?

From writing to you when your check-up is due, to carefully explaining why we are recommending any of our course of treatments, we will always take the time to keep you fully informed.

All treatments begin with a one-to-one consultation, so that you can understand your options, ask any questions and get all the information you need.

Keeping you younger

Why not make the most of your natural beauty?

We offer a wide range of non-surgical facial treatments to give you a fresher, healthier and younger-looking appearance. We can smooth frown lines, refresh and rejuvenate your skin without the need for surgery, giving you a healthy, natural complexion.

As part of our commitment to providing the very best in cosmetic dental care, we've invested in a state-of-the-art CEREC machine. This enables the team to make perfect-fitting and natural looking ceramic crowns, inlays and veneers while you wait. It's quicker and more convenient for you because everything is taken care of within a single appointment.

Patients are also provided with the very latest in dental implants to further enhance a natural looking smile. Dental implants are the most effective way to replace a missing tooth as it looks and feels natural.
